Ho Lok Cheung

+1 (650) 333-8152 | holokcheung@ucla.edu | linkedin.com/in/holokcheung | holokcheung.com | Los Angeles, CA

Education

University of California, Los Angeles Los Angeles, CA | *Expected July 2027*

Bachelor of Science in Computer Science and Linguistics

Relevant Coursework: Algorithms and Complexity, Software Construction, Computer Organization, Programming Languages, Artificial Intelligence, Computational Linguistics

Experience

Software Developer Aug 2026 – Present

UCLA Digital and Technology Solutions, Digital Spaces *Los Angeles, CA*

- Debug and resolve software issues in classroom-facing applications for the UCLA Learning Spaces Modernization Project.
- Write and document code for campus learning infrastructure alongside full-time engineers, using version control and maintaining documentation for shared codebases.

Project Manager Sep 2024 – Dec 2024

NASA L'SPACE Academy *Tempe, AZ*

- Led a team of 20 spanning Chief Scientist, Deputy Program Manager, and Chief Engineer roles.
- Defined and tracked benchmarks for mission-critical semi-autonomous operations and coordinated public mission outreach with NASA engineers and researchers.

Research Intern | **Paper** Jun 2024 – Aug 2024

Stanford University *Palo Alto, CA*

- Built a grid-based evolutionary simulator in Python modeling mutation, genome recombination, and natural selection under configurable mutation rates and spatial constraints.
- Structured it around modular Creature, State, and Action classes with a real-time visualization canvas; first author of the resulting paper, which showed populations re-adapting after the survival zone was relocated.

Operations Intern Jun 2023 – Aug 2023

Hang Seng Bank *Hong Kong*

- Wrote SQL queries to extract trade data and built Excel workflows that tracked daily trade records for the operations team.

Projects

Momento 2026

Full Stack Photo Mapping Web App *React, Node.js, Express, MongoDB, JWT*

- Owned user authentication end to end on a full-stack app that maps uploaded photos to where they were taken, building the JWT auth service in Node.js and Express plus the login and signup pages in React, backed by MongoDB and a REST API.
- Built the photo detail and gallery views and contributed to the public photo feed and community heatmap, shipping against a dependency-ordered sprint plan with UML design docs and weekly reviews on a five-person team.

Naccent | **Code** Jan 2025

Best Student Life Hack, SB Hacks XI *Next.js, Python, Flask, Whisper API*

- Built an AI pronunciation trainer that transcribes speech with the OpenAI Whisper API and scores it at the phoneme level via SpeechAce and a Flask service, returning per-sound quality scores and native speaker comparison.
- Shipped the Next.js frontend with progress analytics in Chart.js after replacing an initial LLM-only scoring approach that handled accents and phonetic detail poorly.

GreenMate | **Demo** Oct 2024

1st Place, Columbia University Hackathon *Snap Spectacles, Lens Studio, AR*

- Built an AR plant-monitoring system for Snap Spectacles in Lens Studio, overlaying live plant health data in the wearer's view.

Technical Skills

Programming: C++, C, Python, JavaScript, SQL, Assembly (x86)

Web and Data: React, Next.js, Node.js, Express.js, Flask, MongoDB, REST APIs, JWT Authentication

Tools and Platforms: Git, Bash and Shell Scripting, Regex, Linux, SSH

Concepts: Data Structures and Algorithms, Multithreading (pthreads), Object Oriented Design

Spoken Languages: Cantonese (native), Mandarin, English

Honors and Activities

- **Regents Scholar** — UCLA's top 2% merit scholarship. **Dean's Honors List** (Spring 2026).
- **USA Team Handball Academic All-American** (1st Team 2026) and **NCAA Division I Rugby**, UCLA.
